

RISE CoE YEAR-ROUND PAID INTERNSHIP PROGRAM

Internship Topic: Image/Video Labeling Tool

Short Description:

Nowadays Deep learning has provided a large collection of data that are useful only if they are properly labeled. However, manually labeling is tedious process and it takes a huge amount of time. In this internship, the student will work in an initial development of semi-automatic tools for labeling images/videos. These tools will provide an efficient and less time demanding way of labeling when compared with manual approaches.

Type: Work Placement

Responsible MRG:

The successful candidates will be assigned to RISE's MRG DeepCamera: The Next Generation of Image/Video Processing.
